## Summary

Results-driven Data Analyst with hands-on experience in SQL, Python, Power BI, and Excel. Skilled in data cleaning, exploratory analysis, visualization, and building KPI dashboards that translate complex datasets into clear business insights. Experienced in handling large transactional data, optimizing data workflows, and delivering actionable recommendations that improve decision-making and operational performance

## Education

**BK Birla College** Kalyan, Maharashtra

*Bachelor of Science in Information Technology | CGPA: 8.02/10* *June 2023 – May 2026*

## Experience

**Data Analyst Intern** Jan 2026 – Mar 2026

*Imarticus Learning* *Thane, Maharashtra*

- Queried and joined relational data using SQL, CTEs and Window Functions across 100,000+ transaction records
- Automated data cleaning pipelines with Python (Pandas & NumPy), reducing null values by 35%
- Designed interactive Power BI dashboards tracking 12+ KPIs across revenue, product and operations
- Created optimized DAX measures and Power Query transforms, cutting dashboard refresh latency by 40%
- Analyzed business trends and presented weekly insights on revenue leakage and product bottlenecks

## Projects

**BMW Sales & Revenue Performance Analytics** | *Python, Pandas, SQL, Power BI, Seaborn* June 2026

- Processed 25,000+ sales and vehicle records using Python and Pandas to uncover pricing trends and regional demand
- Wrote advanced SQL queries with aggregations, GROUP BY and ranking to identify top vehicle series by quarter
- Built multi-page Power BI dashboard with slicers and drill-throughs for dealer, regional sales and profitability
- Identified top-tier vehicle variants contributing 68% of net profitability for inventory recommendations

**E-Commerce Customer Behavior & Cohort Analysis** | *Python, SQL, PostgreSQL, Power BI* Sep 2026

- Analyzed 50,000+ customer transactions to evaluate churn, repeat purchase rate, AOV, and overall behavior
- Performed RFM segmentation using SQL and Pandas, classifying customers into four distinct value-based cohorts
- Developed end-to-end Power BI report on star-schema model tracking fulfillment, customer behavior, and returns
- Detected 14% drop in repeat purchases and estimated $15K+ monthly revenue recovery opportunity

## Certifications

Data Analytics Program — Imarticus Learning (2026)

## Skills

**Data Analysis**: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA, Statistical Analysis
**Programming & Query**: Python, SQL
**Business Intelligence**: Power BI, DAX, Power Query, Dashboard Development, KPI Reporting
**Databases**: MySQL, MySQL Workbench
**Excel**: VLOOKUP, XLOOKUP, Pivot Tables, Advanced Excel, Data Modeling
**Tools**: Jupyter Notebook, Google Colab, VS Code, Git, GitHub
**AI & Automation**: Gen AI (ChatGpt, Claude, Grok, Antigravity) Prompt Generation from AI
**Languages**: English, Hindi
