

AMIT KUSHWAHA

DATA ANALYST

+91 9082816571 | amitkushwaha9082@gmail.com | LinkedIn | GitHub

Education

BK Birla College

Bachelor of Science in Information Technology / CGPA: 8.02/10

Kalyan, Maharashtra

June 2023 – Present

Experience

Imarticus Learning

Data Analyst Intern

Thane, Maharashtra

Jan 2026 – Mar 2026

- Extracted, queried, and joined data across relational tables using SQL, including Joins, CTEs, and Window Functions, while working with 100,000+ transaction records.
- Automated data cleaning and preprocessing workflows using Python, Pandas, and NumPy, reducing null values and data inconsistencies by 35%.
- Designed interactive Power BI executive dashboards tracking 12+ KPIs for revenue, product performance, and operational metrics.
- Developed DAX measures and optimized Power Query transformations and data models, reducing report refresh latency by 40%.
- Analyzed business performance and presented weekly data-driven reports to stakeholders, identifying revenue leakage and product performance bottlenecks.

Projects

BMW Sales & Revenue Performance Analytics

June 2026

Python, Pandas, SQL, Power BI, Seaborn

- Ingested and preprocessed 25,000+ sales and vehicle records using Python and Pandas to evaluate pricing trends and regional vehicle demand.
- Wrote SQL queries using aggregations, GROUP BY, filtering, and ranking logic to identify top 10 performing vehicle series across fiscal quarters.
- Built a multi-page Power BI dashboard with interactive slicers and drill-throughs to analyze dealer performance, regional sales, revenue, and profit margins.
- Identified that top-tier vehicle variants contributed 68% of net profitability, supporting data-driven inventory recommendations.

E-Commerce Customer Behavior & Cohort Analysis

Sep 2026

Python, SQL, PostgreSQL, Power BI

- Analyzed 50,000+ customer transaction records to evaluate churn, repeat purchase frequency, Average Order Value (AOV), and purchasing behavior.
- Performed RFM (Recency, Frequency, Monetary) segmentation using SQL and Pandas, categorizing customers into four value-based cohorts.
- Designed an end-to-end Power BI report using a star-schema data model to monitor fulfillment timelines, customer behavior, and return rates.
- Identified a 14% drop-off in repeat purchases during checkout, highlighting potential UI and pricing bottlenecks with an estimated \$15K+ monthly recovery opportunity.

Technical Skills

Programming & Query: Python, SQL, R, HTML/CSS

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Data Preprocessing, EDA, Statistical Analysis

Business Intelligence: Power BI, DAX, Power Query, Data Visualization, Dashboard Development, KPI Reporting

Databases: MySQL, PostgreSQL, MySQL Workbench, pgAdmin

Microsoft Excel: VLOOKUP, XLOOKUP, Pivot Tables, Advanced Excel, Data Modeling

Tools: Jupyter Notebook, Git, GitHub

AI & Automation: Prompt Engineering, LLM-Assisted Data Workflows, ChatGPT, Claude, Google Gemini
